1 What is the G.Fast Network and what does it mean for schools?

The new G.Fast broadband technology makes it possible for standard copper cables to transmit data at a higher frequency than it ever has before. This means schools that currently have maximum speeds of 80Mbps download and 20Mbps upload, using FTTC broadband, will have access to speeds nearly five times faster for not much more than the cost of their current FTTC service.

2

What is the Schools Broadband BETA Test Community?

We are currently testing our service at BETA stage and would like schools to join our community. As part of the test we are offering schools that are supported by the Network **free** broadband, filtering and security for a year.

3

What are the benefits for my school if I join the BETA test community?

If the G.Fast Network runs past your school, your school will receive free installation, free no-obligation G.Fast broadband for one year, which includes free DfE compliant web filtering and network security; all-in-all worth approximately £4k to a primary school. It will also receive broadband speeds of up to 330Mbps download and 50Mbps upload.
