

FAQs:

4G Filtered Broadband For Remote Internet Access

How does Filtered 4G work and what would we need to do to set it up?

This service can be delivered in different ways: either via a SIM only option for compatible devices such as iPads / Chromebooks or via a USB Dongle or Mi-Fi Router. No configuration is required on the end user device so is nice and simple for everyone.

How much would this cost and how much data would our students require?

A range of data plans are available from as little as 1GB and pay as you go options, all the way to unlimited data usage. We can advise you of the most appropriate plan for your requirements. Simply get in touch by calling 01133 222 333 (+ option 3).

How long would the filtered 4G contract be for?

Short and flexible 30 day rolling contracts are available as well as longer contracts to support students who may require on-going internet access for extended-learning.

How quickly can you set the filtered 4G service up?

The service can be up and running in as little as two days. It's a very simple process and we will support you every step of the way.

Do you have to be an existing SB customer?

You don't need to be an existing SB customer.
