

Designed especially for schools

## The most advanced web filters available

Our hosted web filtering solution from Netsweeper, provides the world's most accurate and comprehensive filtering classification system, for protecting students and staff from unacceptable online content.

### Supports DfE compliance

Developed specifically for education, we filter billions of categorised URLs, including the Internet Watch Foundation lists and the Home Office Terrorism block list. As such, our filters fully meet school Prevent Duty and DfE regulatory requirements.

Automated real-time filtering updates, protect students from harmful content almost as quickly as it is created.

### Fully customisable control

Providing central filtering control for multi-site schools, control in the classroom, or mobile device management, we provide the flexibility to manage granular filtering policies by user, group, time and day, on and off site.

### Reporting

We allow you to view up to 6 months' worth of historical internet usage and our own back-up system will extend this to 3 years. This information can then be presented to the authorities or the police if required.

01133 222 333 | [info@schoolsbbroadband.co.uk](mailto:info@schoolsbbroadband.co.uk)

## The Benefits

**Our unique hosted platform offers scalability for growth, with zero additional hardware costs.**

Safe search across all popular web search engines including Google, Bing and YouTube

Add your own URLs, keywords, file extensions and URL rewrites

Easy to use real-time and predefined reporting

Powerful custom reports and alerts

Filter activity on hundreds of social media platforms

Tailor internet access by user, IP address, group or domain

Block or allow websites for set periods of time

View historic internet use

Meets Prevent Duty requirements

Integrates with Windows Active Directory, Mac Open Directory, Azure, Google and GSuite

## Effective BYOD Filtering

**Web filtering for mobile devices on or off school sites.**

Schools Broadband mobile filtering allows you to extend your existing filtering policies to your off-network devices. This includes Apple devices, Chromebooks, Netbooks, laptops, Windows tablets, android devices and mobile phones.

The Mobile filter offers exactly the same level of protection and reporting as on-site devices, transparently communicating Internet browser requests from a mobile device to our cloud-based filtering system.

This system references the URL requests with its content data-base and policy settings and either allows or blocks the request.

## Mobile device management just for schools

**Designed just for schools, Schools Broadband's Mobile Device Management makes it easy to manage all iOS, Mac OS, Android and Windows devices distributed around your school.**

Delegate multiple levels of administration

Set policies at school, classroom, group and device level

Centralised management of device inventory, reporting, updates and installs

Remote configuration, lock, and device wiping

Integration with the Apple Volume Purchasing Plan

Application deployment and device lockdown – can be managed by both teachers and IT

A central, easy to use cloud interface

Ability to force authentication

Restrictions on device and app use

Time-based policies
