

# BT is phasing out all ISDN phone lines

# Your Guide to the National ISDN Switch-off

What it is and how it will affect your phones

# BT is phasing out all traditional ISDN phone lines

**BT is planning the withdrawal of ISDN phone lines, which means your school will need to switch to a VoIP or SIP phone service.**

VoIP and SIP phone services run over your internet connection and because of this, they reduce line rental costs. Call costs are also significantly reduced.

It's simple to switch your phone service over, and we can start saving you money straight away.

Contact us on 01133 222 333 | [info@schoolsbb.co.uk](mailto:info@schoolsbb.co.uk)

**On average, VoIP and SIP phone services reduce line rental by 70%, saving schools over £1,000 a year or more.**

**VoIP and SIP phone services can provide free UK landline and UK mobile calls**

## What you need to do next

It could be that your existing phone system is already compatible. We can check that for you and take you through the switch-over. Contact us on the details across the page to find out.

If your equipment is not compatible, we can either provide a VoIP phone service or upgrade your current telephone system with a small SIP plug-in gateway so that it is SIP compatible. Remember, VoIP and SIP phone services can save you money. The sooner you switch the sooner you save.

**Last year over half of all voice traffic was via SIP.**
