Enjoy Central Control of Services Across Your Entire Trust Estate

Schools Broadband is a specialist Internet Service Provider to Multi Academy Trusts of all sizes. Providing fast, secure connectivity and high-speed Wide Area Networks, together with cloud-hosted web filtering and network security, our cutting-edge cloud solution is transforming MAT IT infrastructures, **improving standards and cutting costs.**

What's more, because our services are hosted, you can enjoy central control of all your services across your entire estate, and there's no expensive equipment for schools or trusts to buy, store or maintain. It also means all your schools on your network will always **have the latest filtering & security technology**, keeping your students and staff safe and your trust compliant with DfE online regulatory requirements.

Enjoy Easy To Use Services Tailored To Your Trust's Requirements

Our unique filtering and security service is based on operating expenditure only and is tailored to each of your trust's schools' individual requirements.

With full visibility and central control of filtering and firewall policies across your entire trust estate, you will benefit from improved efficiencies and trust-wide standards throughout your full network of schools. Filtering policies can also be managed at a local level if you prefer.

Whilst our platform is easy to use, we deliver full training for all staff and provide you with a recording of the training session for later reference.

We also include a 24/7/365 network security monitoring service as standard.

Ensure The Right Internet Connection At The Right Price

We are firm believers in only ever paying for what you need. That means if your schools' connections are fast enough already, we will advise you to stay with the same speed. If you do however require faster speeds, we work with a range of carriers, and **because we are carrier agnostic, will always provide you with the best connectivity price** possible. This could be an improvement on the price your schools pay currently. Ask us for a price comparison.

We are also providers of **new ultrafast broadband**, which gives you all the broadband you need up to 1000Mbps (1Gbps) **to support increased use of cloud services**; all at a far lower price than leased lines!

Secure Peace of Mind With The World's Best Security

The Schools Broadband hosted security service is built on world-leading carrier grade technologies, combining one single, simplified system that combines firewalls, intrusion prevention, antivirus, antispam and application control.

With real-time updates to protect against the latest and most advanced, persistent threats, together with **our advanced Anti-DDoS Protection included as standard, none of our schools have suffered an outage since 2019 due to an attack.**

Securing and protecting schools is what we are known for, it's what we excel in and it's why we have received the **ISPA Award for Best Security four times in the last five years.**

Contact us for advice on protecting your school networks.

Safeguard Students & Support Compliance With Advanced Filtering Technology

Our hosted web filtering platform, designed in conjunction with Netsweeper, provides the world's most accurate and comprehensive filtering classification system, actively protecting users from harmful online written and visual content.

As well as providing trusts with **full customisable central control of filtering policies** and DfE online safeguarding compliance for every one of your trust's schools, we also provide **real-time predefined reports and proactive alerts** on suspicious searches. These can be **emailed daily to your Designated Safeguarding Leads**.

Continual updates to our hosted filtering platform and a recent £500K investment, means our advanced filtering technologies ensure you receive some of the world's foremost online safeguarding.

Easy to use predefined reports and alerts to protect your most vulnerable students

Improve Communication & Reduce Costs With A VoIP School Phone Service

BT's national withdrawal of analogue and ISDN phone lines means everyone in the country must switch to a VoIP or SIP phone service if you haven't already.

This type of service however is perfect for Multi Academy Trusts. With our Wide Area Networks, it allows free site to site communication throughout your entire school network and has many other useful features to improve and streamline communication. There are also significant savings to be made on call charges, line rentals and system maintenance.

If you would like more information, an informal discussion or a quotation for any of our services, please contact us. You can also visit our website for more details: www.schoolsbroadband.co.uk
