Hosted VoIP Telephony

My School Phone is a complete VoIP telephony service for schools and MATs. It is packed with clever features and provides a comprehensive range of facilities that will help to improve operational efficiency in your school. Unlike most phone services, My School Phone has been designed specifically for schools with safeguarding and compliance in mind.

Improve Efficiency

Easy to use and simple to configure, My School Phone feels just like using a traditional phone; the difference being it can save you money and uses advanced technology that allows you to operate in new ways. Our VoIP phone service can help make your school more efficient, safe, secure and compliant.

Packed with Efficient Features

Complete Flexibility - No matter how often your school changes or grows, My School Phone can change with you: change or add new users, add extra phones to the network, or update your system preferences. You have complete control of your phone network configuration. My school phone comes as a fully featured system with administrative features that make it easy to manage and monitor your usage, performance and costs.

Seamless Connectivity and Integration - Linking office phones to mobiles, voicemail to email, our desktop application seamlessly connects your PC and phone. With this technology you can speed up call handling with click to dial and directory dialling, monitor calls and much more.

Work Anywhere - My School Phone's remote phone feature lets school staff make, take and transfer incoming calls from any location or any mobile phone. This service can be added to your existing phone service, enabling staff to answer calls at home or on any mobile device. Plug and play handsets allow you to use your work phone anywhere there is an Internet connection. This means that you can easily work from home or at any site in your Trust.

Dedicated Lines - Take advantage of dedicated phone numbers for specific departments or absence lines to ensure important calls are directed to the right department and not missed.

Safeguarding

At Schools Broadband we mean it when we say that safeguarding is at the heart of what we do, and that doesn't stop when it comes to our phone service. My School Phone is different to most off-the-shelf VoIP services. It's designed for education, so we've packed it full of features that help keep your school's pupils and staff safe:

Dedicated student support lines - We know that safeguarding a child's welfare is paramount in your school. That's why we can set up dedicated support phone lines where students can anonymously call and record messages. Support lines can be used to report bullying, express mental health worries and other safeguarding policies.

School-wide paging - My School Phone has an in-built paging system that allows anyone to broadcast messages to all phones in the school. Invaluable for information, communication and emergencies.

Call recording - Our telephony service allows you to record calls to ensure important calls can be retained or replayed where required.

Secure Group Calls - Host group calls with multiple staff members. Set up pins for safe and secure calls to protect sensitive conversations, particularly useful for safeguarding concerns.

Security Alerts

My School Phone can play a central part in supporting the early communication of emergency situations. The ability to activate loud security alerts played through the VoIP phone handset can improve the safeguarding and welfare of children quickly.

On activation in an emergency situation, the security alert system plays a loud, unique alarm through all or selected handset speakers throughout the school building, enabling schools to alert staff and students in all or zoned areas.

Our phone service provides the facility to play recorded messages from the handset speakers, enables paging alerts for emergencies, as well as internal chat messaging and pop-up desk messaging on the phone app should discrete communication be required.
